Les convulsions sont contagieuses.

572

"Les maladies convulsives sont contagieuses lorsque les humeurs du malade sont irritées et irritantes que par la transpiration ~~et~~ ou par les sueurs, il se répand un virus qui se communique par la respiration ou par le contact. Il infecte le sang de ceux qui en approchent.

Mais sans supposer cette corruption la contagion peut avoir lieu à l'égard des sujets faibles et délicats et les femmes et les enfants qui, ayant reçu sympthotiquement le malade, se voient être une tension et une mobilité de fibres et un empressement à peu près semblables à la constitution de cette renouée. Ils trouvent très susceptible de tremblement et des convulsions en quoi consistent les symptômes de la maladie."

Dumoulin. Traité des
convulsions et des spasmes. pp. 207. 208

for various reasons, but for the most part, it is a matter of convenience.

The first reason is that the system is very simple and easy to use. It is a matter of convenience for the user to be able to use the system without having to learn a lot of complicated rules. The second reason is that the system is very flexible and can be adapted to a wide range of different situations. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The third reason is that the system is very reliable and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways.

The fourth reason is that the system is very secure and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The fifth reason is that the system is very easy to learn and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The sixth reason is that the system is very easy to use and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The seventh reason is that the system is very easy to learn and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The eighth reason is that the system is very easy to use and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The ninth reason is that the system is very easy to learn and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The tenth reason is that the system is very easy to use and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways.

Conclusion The system is a very simple and easy to use system. It is a matter of convenience for the user to be able to use the system in a variety of different ways. The system is very flexible and can be adapted to a wide range of different situations. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The system is very reliable and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The system is very easy to learn and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The system is very easy to use and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The system is very easy to learn and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways. The system is very easy to use and can be used in a wide range of different environments. This is a matter of convenience for the user to be able to use the system in a variety of different ways.
