1621 : The Anatomy of melancholy ⁶¹⁻²
what it is. With all the kind, causes,
symptoms, prognostics and several cures of
it. in three partitions, with their several
sections, members and subsections, especially
medically and historically, opened and cut
up, by Democritus Junior.

Le subit ed. par le nom de Faucher.

Robert Burton.

Def : " Il est en lui origine in health life "
" A mind of sobriety, without fever, having
for his ordinary companions, fear and sadness
without any apparent occasion. "

Le siège : entre le cerveau, et le cœur : " The
best evidence is that it is the brain, as it
is the seat of the reason, and the heart is
the seat of the affection. In melancholy,
the imagination first is at fault and before the
reason, and then originates in the brain. "
