est l'aneurisme pulmonaire : est revêtement
avec expectoration, une tumeur de la surface et
indurécité du wulst ~~est~~ prius l'autopsie
"l'émulsion du poumon" (6) 175

C'est une tumeur en 2 semis moyen qui donne
à l'émulsion (7)

A. J. Landri Braun
Sémiologie (Paris 1813.)

1. The first part of the paper is devoted to a general
 discussion of the problem, and to a review of the
 literature. It is shown that the problem is of great
 importance, and that it has not yet been solved.
 2. The second part is devoted to a detailed study of
 the problem, and to a discussion of the various
 methods which have been proposed for its solution.
 3. The third part is devoted to a discussion of the
 results of the various methods, and to a comparison
 of them with the results of the experiments.
 4. The fourth part is devoted to a discussion of the
 conclusions which can be drawn from the results of
 the various methods, and to a comparison of them
 with the results of the experiments.

5. The fifth part is devoted to a discussion of the
 conclusions which can be drawn from the results of
 the various methods, and to a comparison of them
 with the results of the experiments.

6. The sixth part is devoted to a discussion of the
 conclusions which can be drawn from the results of
 the various methods, and to a comparison of them
 with the results of the experiments.

7. The seventh part is devoted to a discussion of the
 conclusions which can be drawn from the results of
 the various methods, and to a comparison of them
 with the results of the experiments.

8. The eighth part is devoted to a discussion of the
 conclusions which can be drawn from the results of
 the various methods, and to a comparison of them
 with the results of the experiments.

9. The ninth part is devoted to a discussion of the
 conclusions which can be drawn from the results of
 the various methods, and to a comparison of them
 with the results of the experiments.

10. The tenth part is devoted to a discussion of the
 conclusions which can be drawn from the results of
 the various methods, and to a comparison of them
 with the results of the experiments.
