Spitzka
self-abuse in relation
to insanity

The Dublin Medical Journal
1887

Folie masturbatorin ²³⁴

"There is also a form of delusional insanity developing during and after puberty, which deserves the name of masturbatic insanity. It is chronic, has a tendency to a restless form of dementia, and in its beginning, it is characterized by anxiety, fear, suspicion and depression. Later, confusion and more excitement occur, and still later, rage and destructiveness."

also in A. von Schrenck-Notzing
Med. 1895 p. 19.
